

Muhammed Jishad

Quality Assurance / Civil Engineer
G&E Industrial Supplies, Inc.

Muhammed Jishad is a Quality Assurance and Civil Engineer supporting U.S. Government operations in Qatar with G&E Industrial Supplies, Inc. He brings over five years of progressive experience delivering civil and MEP infrastructure projects within secure, mission critical environments. With a bachelor's degree in civil engineering and a disciplined compliance driven mindset, he provides structured engineering oversight aligned with stringent U.S. Government standards.

As a Ministry of Municipality and Environment Certified Engineer in Qatar and a PMP® credential holder from the Project Management Institute, Jishad integrates technical field execution with formal project governance frameworks. His dual expertise enables him to bridge on-site operational control with contract compliance, documentation discipline, and risk-based quality management systems.

In his current role, Jishad oversees quality assurance processes across infrastructure upgrades, facility modernization programs, and MEP enhancement projects within secure U.S. Government installations in Qatar. His scope includes technical submittal review, site inspections, BOQ validation, schedule monitoring using Primavera P6, documentation control, and inspection readiness coordination. He works closely with subcontractors, vendors, and client representatives to ensure strict adherence to contractual specifications, safety regulations, and inspection standards prior to final approval.

His project portfolio includes water system improvements, HVAC replacements, generator cooling line upgrades, structural modifications, residential villa programs, and large-scale infrastructure developments. Through proactive risk identification and disciplined quality enforcement, he contributes to reduced rework exposure, improved inspection approval cycles, and strengthened compliance performance across multi building projects.

Technically proficient in Primavera P6, Microsoft Project, AutoCAD 2D, and Revit Architecture, Jishad enhances schedule predictability, cost awareness, and operational efficiency by aligning project controls with field supervision. His structured approach supports financial accountability,

protects contractual integrity, and ensures mission continuity within high demand government environments.

At G&E Industrial Supplies, he is focused on strengthening integrated quality management frameworks, advancing compliance systems, and supporting sustainable infrastructure delivery for U.S. Government customers in Qatar. His leadership philosophy centers on accountability, safety excellence, disciplined execution, and long-term operational reliability ensuring both organizational performance objectives and customer mission requirements are consistently achieved.
